

Personas & Scenarios

Persona 1 — Sarah David (Event Organizer)

Age / Role	32, Full-time Event Coordinator
Goal	Create and manage multiple events monthly; monitor sales in real-time
Frustrations	Manual spreadsheet tracking; no single dashboard; slow event updates
Tech Comfort	Intermediate — uses web apps daily

Scenario — Creating a New Event

Sarah logs in to her organizer dashboard. She clicks 'Create Event,' enters the event name ('Summer Jazz Night'), date, venue, capacity of 200, and ticket price of £25. She submits the form. The system creates the event and redirects her to the event management page, where she sees the event listed with 0 tickets sold and 200 available. She then shares the event link with her social media followers.

Persona 2 — Ali Hussain (Customer / Attendee)

Age / Role	28, Software Developer / Frequent Event-Goer
Goal	Find and book tickets to concerts, tech conferences, and sports events quickly
Frustrations	Events scattered across multiple websites; double bookings; no single history view
Tech Comfort	High — comfortable with web and mobile apps

Scenario — Booking a Ticket

Ali accesses the homepage and searches for 'tech conference'. The search results page displays three events. He clicks on 'NodeConf Europe 2025' to access the details: date, venue, cost, and number of tickets left (42). He clicks on 'Book Now', chooses 2 tickets, and confirms. The system generates a booking record, reduces the capacity by 2, and generates a booking confirmation page. He accesses 'My Bookings' to check if the booking is displayed correctly.
